Remission, the third EP by Viennese post-metal band BOG, follows 2017's first full-length album Unshriven.

With Remission, BOG start the journey into a new era. Remission is the first part of a trilogy that deals with being, defeats and the subsequent resurrection of one's own existential raison d'être.

In Remission, songwriter Tim Primbs processes the last years of his father, who suffered from dementia and with whose death many answers to questions never asked were lost, but also a reunion through a near-death experience of the songwriter who had to find his way back to life after a lightning strike.

Remission is the answer to an ambivalent construct, that of one's own existence and history questioned our past. A foundation that consists of light and just as many shadows.

Raw, destructive energy and melancholic melodies create a soundscape that turns the structural ambivalence into a nearly 30-minute race against time. Familiar sounds from the Unshriven era can be found, but with Remission BOG made a new tonal statement that clearly reflects the further development of recent years.
